In covering this issue. I am in support of XM's push to support local information and updates on things like Local weather and Local Traffic. The reasons for this are because one they have the freedom of speech to allow them to talk and cover information freely and openly to the public as long as they follow FCC guidelines. The second reason is for the convenience on getting the information and how fast this information can be obtained. And the Third reason is because I pay for these services. Please allow XM radio to keep providing these services.
